# Introduction

**Best Electro Surgical** family has manufactured high quality surgical, dental, manicure, and veterinary instruments to the world market for over a century. More than 30 years ago, **Best Electro Surgical** established its own sales and marketing facilities in the Pakistan. Through constant innovation, we continue to provide the highest quality instruments and unparalleled service to meet and exceed all of our customer's needs.

Our customer base spans across the Pakistan, as well as globally. Although we have an extensive customer base, we continue to treat each customer with individual attention. We are a smaller firm that deals direct with manufacturer and therefore can offer competitive pricing and take pride in giving a more personalized service. We view ourselves as an extension of your department and will go to great lengths to find the instruments you require. We will provide competitive pricing on any brand or manufacturer. We will do our best to work with your budget, and inventory any items upon request.

Among surgical, dental, manicure, and veterinary instruments, sell a variety of surgical, dental, manicure, and veterinary instruments here at **Best Electro Surgical**. We have handpicked some of the industry's top products designed to relieve pain, increase range of motion, and get people back on their feet as quick as possible. These products are used by physical therapists, occupational therapists, athletic trainers, chiropractors, and the average person daily all over the world.

We primarily distribute German manufactured, German stainless steel surgical, dental, manicure, and veterinary instruments. All instruments have a LIFETIME GUARANTEE on material workmanship.

Thanks and regards,

# Process of Instruments

**Steel** the quality of steel is very important in the production of quality instruments. The best you select the best you produce. In order to ensure the finest of quality steel, we have imported or best quality local steel as required by valued customers.

**Forging** is a process of cutting shaped raw instruments with the help of dyes and hammers. Here, the skilled hands give life to the metal and give it the rudimentary shape that will go through series of complicated processes.

**Forging Inspection** at this stage, forged tools are checked to ensure no piece contains any cracks or is reshaped beyond acceptable limits. Checking the quality of raw instruments for: -  
a. Shape fault b. Broken

**Machining** in this process forging is cut or shaped by machines i.e. cutting sharp edges and raw material in the shape. Here instruments are given their shape through grinding and hammers. For this purpose, extremely skilled labor is required and this process is carried out by instrument specialists only.

**Milling** drilling of holes in the instruments where required for screws. Different kinds of screwing machines are used and instruments are made pairs here. Instruments with even the slightest difference in whole positions will suffer otherwise.

**Inspection** at this stage, all the instruments is inspected not only for machining and milling, but for every process they've been through. It's the stage where only best instruments are selected and instruments with tiny holes and manufacturing faults are again sorted out.

**Filling** at this stage the steel is not too hard so filling is used to shape the instruments in the exact shape they are required to be. The workers match the shape exactly with the samples provided at this stage. So the instruments get most of their shapes at this stage.

**Filling Inspection** after filling the inspection is made and measurements and shapes are checked according to samples.

**Binding and Temper** at this step the instruments are bound in groups of 12 pieces. Then they put them in temper machine, which is filled with a particular material. Here instruments are tempered and its ensured that every instrument get equal heat and treatment so a consistent quality would achieve.

**Snuffing Fitting** for scissors and forceps they are in two pieces so they are joined in this process with screw. Forceps (Tweezers) are joined before and their joint is leveled with a machine by burning the raw material on the joint. At the same stage, instruments are filled to eliminate welding suspensions.

**Plant or Heat Treatment** in this process the instruments are dipped in a material by hanging for five minutes to harden the material.

**Polishing** instruments is polished at this stage. Till this point at manufacturing stage, all the necessary shaping is done. Polishing makes every millimeter of instrument clear and any instrument with hidden defects are revealed could be sorted out.

# Process of Instruments

**Best Electro Surgical Inspection 2%** of each lot of instruments is checked by executives and then goes the further processing. In inspection they see each and every part and defective parts are marked with red marker and if rejected send to polishing again.

**Ultrasonic cleaning** in this process the instruments are dipped in two materials for cleaning the polish raw thing on it. One min. for first material and then for half min. for other material. Ultrasonic cleaning cleans any polishing material stuck and leaves the instrument crystal clear.

**Lubrication** all the instruments involving screws are lubricated at this step. Lubricating the instruments moveable portions facilitates the instrument movement.

**Tuck checking** In this process workers check the cuts and all other things just by viewing the instruments individually.

**Etching** putting each instrument on stamp pad and burning process to put stamp on each instrument. This stamping procedure is done through electronic etching machines that make the stamp reliable and even sustainable under high boiling temperatures when instruments are sterilized.

**Cleaning and Checking** instruments are cleaned and checked again one by one. Again it's the checking for operation, measurements, polish and usability.

**Best Electro Surgical Inspection 4 %** of the instruments is inspection by SSE Directors. Samples for inspection are taken randomly and are observed to every bit of detail. Even the slightest difference from acceptable standards could result in rejection of whole lot.

**Packing** in boxes each contains 100 pieces. 10 Boxes in an each Carton. Here instruments are packed with respect to sizes and types. Instruments boxes are properly labeled and stored in proper storing environment.

**Labeling** is put in this process.

**Storage** by lot and order number

**Plasterless articulator galetti  
(white)**

**BES-D-30-101**

high tech plasterless articulator galetti with adjustable screws at rears & front. solidly constructed of metal alloy casting. all anatomical movements possible

**Vibratory polished articulator galetti  
BES-D-30-102**

galetti articulator is solidly constructed of metal alloy casting. easy to use, allowing quick fixation of model. immediate adjustment of the occlusal & corrects imulation of central relation. all anatomical movements possible. vibratory polished

**Anatomical articulator (asa)  
BES-D-30-103**

anatomical articulator with bearing rod & incisive pin, 4 mounting plates & supporting back-pin for 45° view, opening 125°, intercondylar distance 110 mm - solidly constructed of metal alloy casting

**Universal articulator  
BES-D-30-104**

anatomical articulator, made of aluminum pressofusion of only

**Gnatus pro jp30 articulator  
BES-D-30-105**

the gnatus pro jp30 articulator offers the best performance with an excellent degree of accuracy. its functionality makes easier

**Anatomical articulator  
BES-D-30-106**

**KEYSTONE BLACK ARTICULATOR  
WIRED  
BES-D-30-107**

keystone deluxe universal type-a articulator. interchangeable, incisal pin included, lateral excursions.

**KEYSTONE DELUXE MAGNET  
ARTICULATOR  
BES-D-30-108**

keystone deluxe magnetic denture articulator with plates, interchangeable, incisal pin included. magnetic split casting ensures easy & exact setting, lateral excursions

**PROFESSIONAL OCCULUSOR  
ARTICULATOR  
BES-D-30-109**

professional occlusor, vibratory polished articulator - aluminum, brass, stainless steel

**Magicart-1 Articulator  
BES-D-30-110**

lightweight, high-quality magic art articulator securely holds quadrant models, conserve materials & time! quickly & easily mount pre-cast dental models with the high quality. with

**FULL DENTURE ARTICULATOR (ROUND)  
BES-D-30-111**

full denture chrome plated articulator (3 slot round)

**MODEL 'M' HI TOP STEPHAN  
ARTICULATOR  
BES-D-30-112**

full denture chromium plated articulator. provides additional vertical dimension for acceptance of higher models. 49 wide at the joint & has a vertical

**Chromium plated plain round**  
**BES-D-30-113**

Nickle Chromium Plated Plain Round  
Articulator

**Universal articulator (yellow)**  
**BES-D-30-114**

universal articulator opening  
125° with 4 mounting plates -  
condylar inlination fixed at 30°,  
intercondylar distance at 110mm,  
bennet angle fixed at 7°, distance  
between mounting plates 85 mm.  
solidly constructed of metal  
alloy casting. available in assorted  
colors

**Foster denture articulator**  
**BES-D-30-115**

this articulator is equipped with  
an adjustable anterior pin stop &  
posterior screw stop, and  
constructed of a slightly heavier  
gauge brass giving the  
articulator a more solid feel.

**Fork chrome plated articulator**

**BES-D-30-116**

nickle chromium plated

**Hinge articulator full arch**

**BES-D-30-117**

an economical & simple chromium  
plated hinge articulator for  
Mounting full arch cases low

**Quadrant / crowned bridge**  
**Articulator**

**BES-D-30-118**

brass hinge crowned bridge  
articulator for mounting  
quadrant cases. crown & bridge

**Universal articulator (blue)  
BES-D-30-119**

universal articulator opening 125° with 4 mounting plates - condylar inclination fixed at 30°, intercondylar distance at 110mm, bennet angle fixed at 7°, distance between mounting plates 85 mm. solidly constructed of metal alloy casting.

**Foster / apex # 2 articulator  
BES-D-30-120**

foster / apex # 2 articulator, the width at the joint is 1-3/4" with a vertical parallel height of 2-1/8". the small size of this articulator allows the versatility to use for full or partial work. the finish is bright chrome. high back

**Mortimer-i oculader articulator  
BES-D-30-121**

plainline ball bearing mortimer-i oculader articulator. all filled with high carbon steel balls for smooth setting & articulation of denture

**Mortimer-ii oculader articulator  
BES-D-30-122**

plainline ball bearing mortimer-ii oculader articulator. all filled with high carbon steel balls. semi-adjustable articulator

**Occlusor, wire articulator  
BES-D-30-123**

occlusor, wire articulator - stainless steel & aluminum

**Asa articulator 5002  
BES-D-30-124**

asa articulator with lateral moment. made of aluminum die casting with 2 mounting plates.

**Model \"A\" Crescent Stephan Articulator**  
**BES-D-30-125**

CRESCENT STEPHAN MODEL \"A\" ARTICULATOR IS USED FOR PARTIALS, CENTER SPRING WITH ADJUSTABLE TENSION, SMOOTH BRASS CASTINGS WITH NICKEL PLATING, CENTER BAR IN BOTH UPPER & LOWER BOW FOR MAXIMUM PLASTER RETENTION & STRENGTH. WIDTH AT THE JOINT OF 29, & VERTICAL SPAN WHEN BOWS ARE PARALLEL OF 21/8\". REPRODUCE ALL ANATOMICAL MOVEMENTS. UPPER AND LOWER SECTIONS MAY BE SEPARATED OR ASSEMBLED QUICKLY. OPEN CONSTRUCTION PROVIDES FREE ACCESS TO LINGUAL SURFACES. ANATOMICAL IN EVERY RESPECT

**Bite Fork / Occlusal Alignment Plane**  
**BES-D-30-126**

BITE FORK IS A RELIABLE INSTRUMENT FOR CHECKING THE CORRECT POSITION OF THE MASTICATORY PLANE, ACHIEVING PARALLELISM OF THE OCCLUSAL PLANE WITH THE CAMPER'S LINE & THE BIPUPILLARY LINE IS FUNDAMENTAL TO THE CONSTRUCTION OF DENTURES
